

Anniversary 10th meeting
23 – 31 July 2016
Minsk, Belarus

INVITATION TO STUDENT SUMMER SCHOOL

Hi, folks!

Are you interested on energy, environment and economics of energy systems and their applications? Have you seen the latest innovations in green and clean energy technologies? Finally: do you like camping and being outside?

We hereby like to invite you to the anniversary 10th EUREN SSA student summer camp this July in Belarus!

EUREN SSA is a **one-week open-air meeting** for students from all over Europe, studying programs related to environment & sustainability. The idea of EUREN SSA is to learn more about the environment and its related subjects during field trips & workshops, to gain new knowledge during lectures held by experts and to share your experiences. It is a possibility to apply your unique knowledge in a different environment and to compare the aspects of environmental sciences in various countries and research fields. Another important aspect of EUREN SSA is to make new international friends with similar interests, and have a lot of fun, of course ☺

EUREN SSA 2016 will take place **23 – 31 July in Belarus**, the country well known for its beautiful natural scenery. This year's topic is "Energy: sustainable tomorrow starts today" and the program is divided into several sessions:

- Energy sources and alternative energy
- Energy storage
- Energy saving technologies
- Economics of energy systems

We are looking for highly motivated students with **all different kind of backgrounds** (e.g. ecology, management, engineering, earth/envir. sciences, sustainable development, ...) to explore environmental issues in an interdisciplinary context.

For further information and application, please visit our website <http://eurenssa2016.by/> or like us on Facebook (<https://www.facebook.com/eurenssa>).

We hope to see you this summer in Belarus!

Ivan Reznikov

Project coordinator EUREN SSA 2016

EUREN SSA '15 in Germany
