

Propuneri de colaborare in proiecte de tip Open Lab la nivelul aliantei CIVIS

Proiectele de tip open lab sunt finantate din fonduri CIVIS si au o componenta transnationala, adica se va lucra in echipe alaturi de parteneri, in ideea replicarii unor proiecte similare.

Cele doua propuneri sunt:

1. **Voices of Palmyra:** *This project addresses the preservation of world heritage memory for future generations. It focuses on conserving the memory of heritage and the multicultural history of Palmyra within local populations, notably among Syrian refugees in Jordan and Switzerland. It could thus be extended to other European cities. To achieve this, various activities are undertaken, including history classes and embroidery workshops that have led to a fashion show in Switzerland, aimed at raising awareness among citizens about heritage preservation issues.*

2. **“Coeur colère”** *is a theater piece. This multidisciplinary creation explores the analogy between repressed anger in the feminine gender and nuclear power. It addresses ecology, the notion of progress, and the necessity for a societal transformation. It underscores the mobilizing and productive potential of anger while also questioning the necessity of ending human self-destructive behavior. To develop the play, the artist and her team will conduct interviews, visit laboratories and nuclear power plants, engage with researchers in social sciences, cognitive sciences, and nuclear physics.*

Desigur, daca exista propuneri de proiecte anterioare cu impact local care ar putea fi replicate la nivelul altor teritorii, se pot face si noi propuneri similare.

*Propuneri pana joi, **16 mai 2024***
